# New Eaton 9SX 15KVA/20KVA UPS

The new Eaton 9SX 15K/20K UPS provides stable power for critical IT infrastructure, Industrial, Manufacturing and Medical devices. With advanced technology to improve the double conversion efficiency and reduce footprint, saving both cost and rack space. Eaton's 9SX product with its robustness in design for harsh environments. or applications outside of a comms rooms.

IT infrastructure (High-density Racks)

Industrial & Manufacturing

Medical Applications

## Key feature

### High efficiency

Double conversion efficiency up to 96%.

9SX reduces energy usage & CO2 emissions to help IT Managers save costs on power and cooling.

### High power density

- The 15KVA/20KVA power model is only 3U rack space.
- Short depth chassis suitable to be deployed in cabinets as shallow as 800mm deep.
- 438mm width for standard 19" rack mounting.

9SX reduces space with same power rating.

### High power factor

Unity power factor VA=Watt

Powers more servers than similar UPSs with equivalent VA ratings with lower power factors.

### Versatile installation

Can be easily deployed as a rack mount or free standing (tower) unit.

### Versatile wiring

Wide array of electrical environment.

Input and output wiring can be connected as 3 phase or 1 phase.

#### 3-3, 3-1, 1-1 mode

Utility input and bypass input can be connected as single source or separated source.

All wiring modes catered for by a single SKU. Modes are changed by use of copper jumpers provided.

### Parallel operation

For redundancy and expanded power rating.

### ESS mode

Achieve up to **98.8%** efficiency in ESS mode. System switches to online mode on demand in less than 2ms response time.

### Battery management

Eaton's exclusive ABM® technology increases battery service life by 50%. ABM uses an advanced, three-stage charging technique and closely monitors battery health to provide advanced notice when batteries need replacement.

Variable charging current ranges from 0-13A, suitable for recharging larger battery banks.

### Endure harsh environment

Operation temperature up to 50 °C.

Maximum operation altitude up to 4000m.

Line mode overload capacity up to 10min at 125% rated load.

### Professional HMI for operation, configuration and setting

Multi connectivity port – RS232, USB, dry in/out, EPO, intelligent slot.

### Large coloured touch screen LCD

Built-in gravity sensor that automatically rotates the screen based on UPS deployment orientation.

### Intelligent Power Management Software

IPP/IPM compatible with all major OS including virtualization software such as VMware and Hyper-V.

## Product accessories

### MBP (maintenance bypass model)

Integrated maintenance bypass and load segment.

Load segment control enables prioritized shutdown of nonessential equipment to maximize battery runtime for critical devices.

Paralleled systems require 1 x MBP per UPS module.

MBP20KPARA (Paralleling module) available for ease of deployment of a 2-UPS paralleled system.

### EBM

Connect up to 6 pairs (2\*6) of EBMs for extended runtime. Minimum deployment is 2 x EBMs per UPS, with increments of 2s.

## Connectivity card

### Network-M2

Giga bit network card.

### INDGW-M2

Giga bit Modbus card.

### EMPDT1H1C2

Environmental module. Monitors temperature and humidity.
